Hebrew ●●●●●

English ●●●●○

PROGRAMMING

PowerShell

Python

C#

VBScript / Batch

ABOUT ME

Resourceful autodidact, married with three children. Passionate about leveraging AI to transform infrastructure operations. Not afraid to tackle new challenges or learn cutting-edge technologies.

Yitzhak Bohadana

VMware & Storage Administrator | AI-Powered Infrastructure

Enterprise virtualization, global storage management, and AI-driven automation specialist

WORK EXPERIENCE

Global Storage & Virtualization Administrator

2022 – Present

Cognyte (CGNT) — Intelligence Analytics

- Oversee global datacenters: NetApp, HCI, Dell, VSAN across multiple sites
- Design and operate hosted private cloud infrastructures (VMware-based)
- Lead datacenter migrations between public and private clouds
- Plan and implement automation solutions with PowerShell & Python
- Ensure high availability and DR for mission-critical VMware environments
- Leveraging AI tools daily: Claude Code, Azure AI Foundry, VS Code Copilot for automation and scripting
- Designing RAG system over enterprise NetApp NFS storage with vector database integration

Professional Services Engineer

2016 – 2022

We-Ancor — NetApp Partner

- NetApp AFF/FAS ONTAP infrastructure: installations, migrations, upgrades
- VMware/Hyper-V environments — design, deployment, and support
- Monitoring: VRO, OnCommand Active IQ, OCI, Grafana dashboards
- SnapCenter, SnapManager, SnapProtect, SapCreator implementations

Professional Services Engineer

2013 – 2016

Harel Computers

- vSphere upgrades, SRM, Veeam backups, VDI Horizon View
- NetApp C-DOT SME, Microsoft AD/Exchange upgrades, P2V migrations

Systems Engineer

2011 – 2013

We-Ancor

- SCCM, SCOM, TMG/UAG, SQL clusters, Exchange, PowerShell automation

Virtualization/Storage & Network Manager

2010 – 2011

IDF Intelligence Base — Military Service 🇮🇱

- VMware ESXi, IBM systems, CISCO networking, EMC VMAX/Clariion, P2V

CERTIFICATIONS

NCDA
